## Auth Profile

[view online](#)

---

An Auth profile is a set of Authentication, Authorization, and Accounting (AAA) attributes used by Avi Vantage users to log into Avi Vantage. The following types of AAA are supported for Avi Vantage user login:

- [Lightweight Directory Access Protocol \(LDAP\)](#)
- [Terminal Access Controller Access-Control System Plus \(TACACS+\)](#)

To configure an Auth profile:

1. Navigate to Templates > Security > Auth Profile, and click Create.
2. Enter a name for the profile and select the type, LDAP or TACACS+.
3. Configure settings for the profile. (See the links above.)
4. When finished, click Save.
