[view online](#)

Function >avi.http.close_conn([reset])

Description Closes the current TCP connection.

Events HTTP_REQ
HTTP_RESP

Parameter The *reset* flag will RST the connection, rather than use the default FIN.

Returns No return value

Example

```
if avi.vs.client_ip() == "10.1.1.1" then
    avi.http.close_conn()
end
```
