Avi Controller Administrative Settings

[view online](#)

The Administration > Settings area of the Avi Controller web interface provides the following options:

- [Authentication/Authorization](#): Choose local or remote authentication and authorization of Avi Vantage users. In the remote case, enables specification of an [auth profile](#).
- [Access Settings](#): Select options for securing management access to the Avi Vantage system.
- [DNS / NTP](#): Specify the Domain Name System (DNS) and Network Time Protocol (NTP) servers used by Avi Vantage.
- [Licensing](#): Display license information and upload license files.
- [Email/SMTP](#): Specify the source for Simple Mail Transfer Protocol (SMTP) traffic from Avi Vantage.
- [Tenant Settings](#): Specify system-wide settings for [multitenancy](#).
- [SSH Key Settings](#): Create or import SSH keys.
- [Upload HSM Packages](#): Upload a customer's Hardware Security Module (HSM) software package, to enable HSM features within Avi Vantage.
