Password-less SSH-based Login for Admin User

[view online](#)

Starting with release 16.3, Avi Vantage enables the admin user to log in using SSH keys, rather than having to supply a password.

CLI

To upload a key:

```
upload adminkey public_key "<public key>"
```

To delete a specific key:

```
delete adminkey public_key "<public key>"
```

To delete all the keys:

```
delete adminkey
```

Using the Avi REST API

To upload a key:

```
POST https://<controller-ip>/api/adminkey JSON data: {"key": "<public key>"}
```

To delete a specific key:

```
DELETE https://<controller-ip>/api/adminkey?key=<public key>
```

To delete all the keys:

```
DELETE https://<controller-ip>/api/adminkey?key
```
