Administration

The administration section of the web interface governs the following system-level resources:

- Accounts: Configure and manage user accounts, roles, and tenants.
- Settings: Configure settings related to:
  - Authentication/Authorization
  - Access Settings
  - DNS / NTP
  - Licensing
  - Email / SMTP
  - Tenants
  - SSH Key
  - HSM Packages
- Controller: Configure Avi Controller management addresses, and view Avi Controller-related events and alerts.
- System Upgrade: Upgrade the Avi Vantage system software.
