Avi Kubernetes Operator Version 1.1.x Release Notes

[view online](#)

The Avi Vantage platform integration with Kubernetes provides a redesigned architecture involving a new operator called Avi Kubernetes Operator (AKO). The following illustration outlines the components of the Avi Kubernetes integration.

What's New in AKO Version 1.1.1

Support for the following:

- CRD for controlling Avi object properties in a Kubernetes native language.
- HostRule CRD to control virtual service properties for ingress objects for SNI virtual services.
- HTTPRule CRD to control the pool level settings in Avi.

AKO Documentation

To install AKO and get started, refer to the [AKO Installation Guide](#).

For more information about AKO, refer to the [Documentation for AKO](#).

To know more about the compatibility matrix for the Avi Controller, AKO, Kubernetes, and Kubernetes CNIS, refer to the [Compatibility Guide for AKO](#).
